## eGFX Breakaway Box 650—Designed for the WX 9100

Sonnet's award-winning eGFX Breakaway Box 650 Thunderbolt 3 to GPU card expansion system was designed and qualified specifically for large, high-performance graphics (GPU) cards. It is the only eGPU chassis recommended by Apple® and qualified by AMD to support the Radeon Pro WX 9100. It is also the coolest and quietest install-your-own-card eGFX box on the market, with a built-in, variable-speed, temperature-controlled fan that quietly and effectively cools the installed card. It also provides 87W Power Delivery - to power and charge even a MacBook Pro 15".

Performance Bundles

Thunderbolt Certified for Mac and Windows

## Turn Your Mac Into a Graphics Workstation

Boost your graphics-intensive applications' performance and save time with Sonnet's eGFX Breakaway Box 650 equipped with an AMD Radeon™ Pro WX 9100 or AMD Radeon Pro WX 8200 graphics card, and transform your Thunderbolt™ 3 equipped iMac®, Mac mini®, MacBook Air®, or MacBook Pro® into a true graphics workstation!

# A

n eGFX Breakaway Box 650 + AMD Radeon Pro WX Graphics Card Performance Bundle delivers a significant graphics processing boost to popular video editing, visual effects, and modeling applications, cutting rendering times and enhancing VFX and color correction workflows.

## Multi-GPU Support

Supported applications' task times can be cut significantly with one eGPU connected, and slashed when two, three, or four eGPUs are employed. Connecting one or more eGPUs can multiply your computer's graphics processing power, enabling it to handle 4K, 5K, 6K, and 8K workflows more efficiently. Plus, the onboard (discrete) GPU also contributes to the aggregate performance.

**M**any pro video and 3D rendering applications rely on workstation graphics (GPU) cards to do the heavy lifting. Unfortunately, most of today's Mac® computers are equipped only with integrated graphics or low-power discrete GPUs that may cause performance bottlenecks when performing these tasks. Happily, for current Mac models there's a simple path to greater performance—external GPUs (eGPUs). Through extensive engineering collaboration, a Radeon Pro WX 9100 or Radeon Pro WX 8200 installed in the Breakaway Box 650 eGPU chassis connects to the computer via a single cable, and works seamlessly with macOS®, with no need for manual driver installations or additional tweaking—it is a true plug-and-play professional graphics solution.

## AMD Radeon Pro WX 9100—The Ultimate GPU for Creators

AMD designed the Radeon Pro WX 9100 workstation graphics card for stability and longevity, using only the highest quality components available. With 16GB of HBM2 memory, this card supports higher memory workflows in rendering applications than consumer cards, while its native 10-bit color support significantly strengthens color grading performance. Plus, with six mini DisplayPort 1.4 outputs onboard, the WX 9100 offers greater display flexibility than gaming cards.

## Superior Support

AMD Radeon Pro WX cards' superior support includes:

- 24/7 enterprise-level support
- Up to 10 Year Warranty: 3-year limited warranty + 7-year extended warranty with registration

## AMD Radeon Pro WX Graphics Cards Specifications

	Radeon Pro WX 9100	Radeon Pro WX 8200
<b>Graphics Core</b> Next Stream Processors	4096 (64 Compute Units)	3584 (56 Compute Units)
<b>Graphics Memory</b>	16 GB HBM2	8 GB HBM2
<b>Memory Bandwidth</b>	484 GB/s	512 GB/s
<b>Memory Interface</b>	2048-bit	2048-bit
<b>Display Outputs</b>	(6x) Mini DisplayPort 1.4	(4x) Mini DisplayPort 1.4
