	installation & Parameters	Page : 6 / 12

#### PARAMETERS

- 1. Open Volfoni Loader
- 2. You need an available internet access
- 3. Connect your Volfoni device to computer by using usb cable
- 4. Turn on device
- 5. Device will be recognized by software

		Version : A00
CREATIVE 3D TECHNOLOGY	Installation & Parameters	Date : 08/12/2018
		Page : 8 / 12

#### You have access to following settings :

- 1. LCD Voltage (V) : 15
- 2. LEFT Eye Delay ( $\mu$ s) :
- 3. RIGHT Eye Delay ( $\mu$ s) :

#### 4. Delta Sync (µs) :

### Set this setting at 0 Set this setting at 0

this setting is frozen, no changes possible

#### Set this parameter at 0

This settings enables to delay or advance the polarizer synchronization signal relative to 3D signal (see figure below). However, this adjustment can be directly done on projector's settings by modifying the delay value.

Consequently, it is better to fix this parameter at 0 on the Volfoni Loader and adjust the delay on the projector according to the Volfoni's technical specifications : see user manual for each passive products (delay and dark time adjustments)

	Volfoni Loader	n ° : DDV160036

5. 3D Synchronization : Normal or Inverted

#### Normal :

#### Inverted :

	Volfoni Loader	n ° : DDV160036
		Version : A00
CREATIVE 3D TECHNOLOGY	Installation & Parameters	Date : 08/12/2018
		Page : 10 / 12

#### 6. AutoMode :

This option concerns following Volfoni devices :

- SCC-H
- SCD
- SCC NEO
- Remarks : this option is not available for SCC-V device

#### Enabled :

- As soon as device receives 3D synchronization signal from projector (>48Hz), system will reach automatically 3D position
- As soon as there is no more 3D synchronization signal from projector (<48Hz), system will reach automatically 2D position

#### Disabled :

- System will stay at 2D position even if a 3D synchronization signal is detected by device
- 7. SafeLock :

This option concerns following Volfoni devices :

- SCC-V / On SCC-V Electronic module, key at "Lock position"
- SCC-H
- SCC NEO
- Remarks : this option is not available for SCD systems

#### Enabled :

- System at 3D position
- 3D synchronization signal enabled
- The following actions will have no impact (system will stay at 3D position) :
  - 2D Manual command
  - o 2D NOC command
  - o 2D Remote command

	Volfoni Loader	n ° : DDV160036

**INPUT / OUTPUT LOGIC** 

### SCC-H & SCC NEO

Go to 3D :

3D Manual command OR
( 3D sync AND AutoMode Enabled ) OR
3D Remote command OR
3D NOC command

Go to 2D :

( 2D Manual command OR ( No sync AND AutoMode Enabled ) OR 2D Remote command OR 2D NOC command ) AND NOT ( 3D sync AND SafeLock Enabled )

## <u>SCC-V</u>

Go to 3D :

3D Manual command OR
3D Remote command
( 3D sync AND AutoMode Enabled ) OR
3D NOC command

	Volfoni Loader	n ° : DDV160036
		Version : A00
	Installation & Parameters	Date : 08/12/2018
		Page : 12 / 12

Go to 2D :

( 2D Manual command OR 2D Remote command ( No sync AND AutoMode Enabled ) OR 2D NOC command ) AND Key at unlock position

### <u>SCD</u>

Go to 3D :

( 3D sync AND AutoMode Enabled AND NOT 2D Remote command AND NOT 2D NOC command ) OR 3D Remote command OR 3D NOC command

Go to 2D :

(No sync AND AutoMode Enabled AND NOT 3D Remote command AND NOT 3D NOC command ) OR 2D Remote command OR 2D NOC command
