AMD Software: PRO Edition 26.Q3 supports the following APIs:

- OpenGL 4.6
- OpenCL™ 2.1
- DirectX® 12.0
- Vulkan® 1.3

Highlights

- Added support for three SKUs: AMD Radeon™ AI PRO R9700, AMD Radeon™ AI PRO R9700S and AMD Radeon™ AI PRO R9600D

Known issues

- Intermittent driver timeout detection and recovery (TDR) events may be observed in Siemens NX when opening models in a dual-monitor configuration.
- An application crash may occur in Print Preview or report generation in Ansys Workbench 2026 R1 on AMD Radeon PRO Navi31 workstation graphics products.
- The AI tab may be incorrectly displayed in AMD Software: PRO Edition on systems configured with AMD Radeon AI PRO graphics products that previously ran AMD Software: Adrenalin Edition
- A Bug Check 0x141 system error may occur while rendering models with Redshift in Maxon Cinema 4D on APU-based systems configured with variable graphics memory.
- In SOLIDWORKS Visualize 2026, intermittent yellow flashing or visual corruption may be observed while interacting with high-end assembly models.

AMD Radeon™ Graphics Support

Starting in 19.Q2, AMD is including Radeon products in our PRO Edition driver. This is being done in consideration of the fact that enterprises use both professional, commercial, and consumer hardware. This driver is recommended for Radeon hardware being used in commercial use cases with productivity applications, including users who need to review CAD data as part of their workflow. It is not recommended for gaming. Workstation performance, features, and

application certifications do not apply to Radeon hardware and no end user benefit will be observed without Radeon PRO hardware.

5. AMD XConnect with Radeon™ ProRender

AMD XConnect with Radeon ProRender support now allows select applications to be accelerated by both internal and external AMD Radeon PRO GPUs simultaneously. AMD XConnect with Radeon ProRender is currently supported with the following professional graphics applications:

- Autodesk Maya
- Autodesk 3DS Max
- Blender
- Maxon Cinema 4D

Other Hardware Requirements

The only approved eGPU enclosure for Workstation XConnect using WX 9100 is the [Sonnet eGFX Breakaway Box 650](#) (with 650W power supply).
